# Kenwood Iris Gardens

# Iris

MRS. J. F. EMIGHOLZ

Montgomery and Euclid Roads

R. R. No. 10

CINCINNATI, OHIO

## TERMS AND INFORMATION

---

**Terms:** Remittances must accompany all orders. No order shipped for less than \$1.00.

**Guarantee:** We believe our stock to be true to name, and every effort is made to prevent mistakes. Should an error occur, an adjustment will be made promptly if we are notified on first blooming.

**Size of Roots:** All roots shipped will be strong single divisions of the roots are large, and double crowned divisions if the rhizomes produce are small. Many white, yellow and pink toned varieties produce small roots. Those of Ricardi or Pallida parentage produce large roots.

**Shipments:** Will be made immediately after blooming season and will continue till September 1st. Many of the finer varieties can not be sent until after July 15th, in order to complete new growth, but the majority can be sent after June 1st. Late planting is not advisable, as the roots do not take hold and the winter frosts tend to heave the ground and throw up and kill the rhizome.

**Transportation:** Orders will be shipped by Parcel Post, unless otherwise requested. We bear the expense of postage on all retail orders except in quantities of 12 or more of a variety. Such quantities will be shipped express collect.

**Mixed Seedlings** at \$5.00 a 100, carriage collect. See page 3. **Mixed varieties** for landscaping from \$8.00 to \$15.00 a hundred. If large quantities are desired, write for special quotations.

In Class 1, where stock allows, the following quantity prices prevail:

12 of any one variety for the price of 10.

3 or more of any one variety at the dozen rate.

# Iris of Quality

*Imported and Grown by*

## KENWOOD IRIS GARDENS

MRS. J. F. EMIGHOLZ

### INTRODUCTORY

Late last fall we moved to our new home on Montgomery Road, where we have good soil and better facilities for propagating stock. The community is known as Kenwood, which prompted the name Kenwood Iris Gardens.

In our old location we were rather crowded, and not able to grow Iris as we would like. But in the new gardens we will be able to produce splendid roots. Recent importations and many of the newer varieties of Iris were transplanted here last summer. These did not winter well, owing to the continued cold and freezing weather, with no snow protection. Many died completely, but we had similar reports from many other growers. So some of the newer varieties will be scarce and high priced for some time to come. We are rather unsettled as yet, but in 1929 expect to have an exhibition of varieties that will be really worthwhile to see.

### THE IRIS AS AN IDEAL GARDEN PLANT

The recent revived interest in Iris is not surprising. There is no plant that is as easy to grow, once the requirements for the different types are understood, and that can survive and bloom under neglected conditions. This may account partly for the indifference shown it in the past years. It seems to be human nature to think highly and spend a great deal of time on plants that may require special and continued care to produce results, and to utterly overlook another flower, because it is easy to grow. This ease of growth is generally limited to the older varieties and those of Pallida or variegata parentage. In the past ten years, varieties have been imported from Asia Minor as Ricardi, Mesopotamica, and Trojana, all types having taller and branching stems with larger flowers. These have been hybridized with the other varieties and hybrids of new color and large size produced. This has caused a great revival of interest in this flower. But these hybrids

need a little extra care. (More detailed information is given under the culture of Iris.) The range of colors has been extended until now we have all shades of blue from a pale gray blue through all the different color tones to deep violet and blackish purple. Pinks from flesh to deep violet pink, no true pink tone has been produced. Many new red shades, from violet, red to a maroon, bronzy coppers to opalescent tones. Whites, yellow from cream to golden and blends having a mixture of colors that are impossible to describe, often with an undertone of yellow that causes the flower to glow in the sunlight. Many of the blended tones are the most exquisite on close observation, but in a mass the color is lost. But they often represent a distinct advance in color.

The Iris can be used in so many places in the garden. Planted in an irregular border along a drive or walk, massed on a steep hillside or a sloping bank, the cheaper varieties and seedlings are unexcelled for this purpose, and help hold the ground. They can be used in a hardy border where the finer varieties show off to advantage. The beardless and the Japanese types need more moisture and do best in a light, loose soil. There are Iris for every purpose except shade, and they will grow in any kind of soil. But if you want fine healthy plants, a few simple rules must be observed.

### CULTURE OF BEARDED IRIS

Sun and good drainage are essential. Many pale colors and blended tones are at their best when shaded a part of the day, especially from the afternoon sun. Raise the beds a few inches to allow the surplus water to run off. Have the soil pulverized and in good condition. Top dress annually with lime and bone meal, or acid phosphate. The latter seems to produce fine fibrous roots. When planting, mix the fertilizer with the soil, place the tubers on the surface of the ground, spread out the roots, and make firm the earth around them. Cover with straw or leaves the following winter to prevent heaving. After they are established, they need no covering except some of the tender Ricardi hybrids. These should be planted in extra well drained beds. Late in fall place a large box over them with panes of glass over the top and put straw around the roots. Only varieties noted as tender need be treated this way to insure success.

### SEEDLINGS

We have been growing seedlings from hand pollinated seed of the finest varieties. Only one white variety, Zada, has been named, and we have received many favorable comments on it. A number are under observation and have been sent to the New York Trial Gardens. Only the best and most distinct of these will be kept. From what we have seen and read, there are too many varieties introduced that are no different and no better than existing varieties, and many that are not good enough to be named. You can be assured that any seedlings introduced by us, will have passed a rigid examination by visiting Iris experts and are only brought out after several years observation. We

have discarded seedlings that were better than many foreign varieties that are selling at a high price. But this year we must dispose of most of the seedlings in our old gardens and so the following reductions are announced.

**Seedling Offers:** The seedlings will be dug in one week of July and all orders must be in by July 1st. \$5.00 per 100 and at least 50 different ones in each 100 or 25 selected seedlings for \$5.00, selected and marked while in bloom but not labeled. These will include some of Dominion parentage and others equally as good. Here is a chance to secure an Iris worth a dollar at a quarter of the cost. These Iris will be a revelation to you, if you are only acquainted with the older varieties.

---

## EXPLANATION OF NEW RATING

In a Symposium for 1922, a jury of competent and experienced Iris growers placed a rating on most of the Iris in commerce. It proved quite helpful in many ways, but was not complete on some points. For instance, an Iris rated at 90 or over might be very large and beautiful with tall branching stems, but it increased slowly, or was a shy bloomer, or required special care and protection, and its value is only for the exhibitor or fancier. A clump of another variety rated at 78 is a beautiful spot in the garden.

There are Iris for all purposes and the average person wades through seas of description and tries to find the Iris suitable for his or her purpose. An exhibition Iris is not always suitable for color effects in the garden. A number of varieties answer both requirements and you will find them so marked. So we are not using the American Iris Society ratings, as other catalogs will show these, but one we worked out two years ago and published for the first time last year. This rating is based on the good and bad points of the flowers as we know it. It is applicable to Iris grown in all parts of the United States with the exception of Southern California and the south. Many Iris that are of slow or moderate growth here and need protection in winter are perfectly hardy and rapid growers in these two localities, where the climate is more to their liking.

This rating has been slightly changed and improved this year. It was not inaugurated to boost sales but to assist you, and has been made as simple as possible, so that in looking over the catalog you will be able to tell the general characteristics of each variety instantly.

After most varieties you will find certain letters and numbers and their application is as follows:

The capital letters represent the type of flower.

E.—Indicates a flower of exhibition type which has some outstanding quality in color or size of bloom, and also one or more of the following characteristics: good form, substance, erect carriage, height and branching habit.

**G.**—Denotes an Iris particularly suited for mass grouping. Some of the most exquisite colors are only noticeable on close observation. We could not be without them as they are distinct, but they do not make impressive color pictures in a mass. None of slow growth, however beautiful, receives this rating, as only a moderate or free bloomer is capable of producing a color picture in garden planting.

The **lower case letters** denote **rate of increase**.

**s.**—Represents slow growth. Many Ricardi and Dominion seedlings have this characteristic.

**m.**—Denotes a moderate rate of increase.

**f.**—Represents free to rapid growth.

The **numerals** indicate **type of stem**.

**1.**—Denotes an erect and often rigid stem, not noticeably or widely branching. This is found in Dominion and many of its seedlings, and most of the older varieties of medium height. Many varieties of pallida origin have this stem.

**2.**—Represents a straight and erect stem that is branching, some more widely than others. It is really the ideal form, although many of the finer varieties do not have it.

**3.**—Represents Iris that have tall and branching stems, but are not erect in wet or windy weather. This includes mainly the cream of the newer varieties, regarding size and color of the blooms. Perhaps some future hybridizer may be able to produce as fine a flower on a rigid stem. But the beauty and size counterbalance the weak stem.

**4.**—Denotes a semi-flexuous stem.

# Tall Bearded Iris

## CLASS 1

A general list of newer and finer varieties. For explanation of ratings see pages 3 and 4.

- AMBASSADEUR** (Vilmorin) E. G. f. 1 .....\$ .75  
S. dull purplish bronze; F. rich velvety reddish purple, lit up with an orange beard. Late. This Iris is really worth all that is said about it. Its richness of color attracts everyone who sees it.
- ANGELO** (Hort) E. s. 2 ..... 1.50  
S. pale lavender blue; F. same, of a deeper tone, but exceedingly long and broad. One of Sir Arthur Hort's immense silky blue bi-colors. 3 feet.
- ANNE BULLEN** (Hort) E. m. 2 ..... 1.50  
A tall and well branched variety, especially notable for its heavy brown reticulations at the haft. S. bluish lavender; F. deep velvety purple. Orange beard. 3 feet.
- ANNA FARR** (Farr) E. G. m. 1 ..... .75  
Although introduced fifteen years ago, this fine plicata is still considered one of the finest of its type. S. white, lightly marked pale blue; F. horizontal and pure white, with pale blue markings at the base. Distinct. 3 feet.
- ANN PAGE** (Hort) E. G. m. 3 ..... 1.75  
A lovely, pale lavender blue self of fine form, good substance and sweet fragrance. For years stock was limited, but we are now able to list it for less. 40 inches.
- ANTONIO** (Hort) E. G. m. 2 ..... 2.00  
An early flowering red-purple bi-color. S. light lavender violet; F. athracene violet with redder lights. Produces one of the largest flowers of any Iris. Erect, of splendid shape and color, this variety should be grown more extensively, as it surpasses many that are more expensive. 3½ feet.
- APHRODITE** (Dykes) E. G. f. 2 ..... 6.00  
Considered one of the finest of the so-called "pink" varieties. It is however, not pink, but combined with lavender or blue produces a pink effect. The flowers are of good size and perfect form, freely produced on 4-foot stems. S. and F. being an even shade of bright violet pink, the falls having a white flush on the center of the blade. Sweet scented. Has a very long blooming season.
- ARGENTINA** (Mohr) E. s. 1 ..... 4.00  
A tall white Caterina seedling of good size with a gold veined haft. A fine flower with heavy, crinkled texture. Needs good drainage.
- ARSACE** (Millet) E. m. 2 ..... .75  
Large flowers of a pleasing color. S. soft mauve; F. mauve slightly tinged old rose. A tall pink toned Ricardi hybrid excellent for backgrounds. 4 feet.

ASIA (Yeld) E. m. 3	\$ 3.00
This Iris ranks with Ambassadeur and Lord of June in popularity. The color is really indescribable, it must be seen to be appreciated. S. broad and massive, pale silvery lavender suffused yellow at the base. F. pale reddish purple, lighter at the margins and heavily, reticulated at the haft. 4 feet.	
ATHENE (Sturtevant) G. f. 1	.75
A vigorous growing warm white of fine form and substance. Perhaps not a prizewinner, but a most satisfactory garden Iris. 2½ feet.	
AURELLE (Denis) E. G. m. 1	Net, 3.00
S. light purplish violet; F. a rich, glowing crimson purple with a bright golden beard. A rich coloring, well worth while. 3 feet.	
AVALON (Sturtevant) E. s. 2	4.00
Pinkish lavender blossoms of good size and fine form. Excellent substance and strong but slow growth. 3 feet.	
BALBOA (Mohr) E. s. 3	2.00
A large, tall red-purple bi-color. Fine distinct flowers of great substance, borne on strong stems. A variety especially valuable as a seed parent. Quite hardy here. 4 feet.	
BALLERINE (Vilmorin) E. G. m. 2	Net, 1.00
S. light bluish violet with rounded, wavy edges; F. deeper blue. Very fragrant. Large flowers on tall, widely branched stems. One of the truly worth while Iris. 4 feet.	
BELISAIRE (Cayeaux) E. m. 2	6.00
Very large flowers. S. fawn suffused rose lilac; F. subdued rose lilac with a yellow haft. Orange beard. One of the type of Isolene. We do not hesitate to say that this is one of the best of the recent introductions from France. Flowers well placed on tall stems. 3½ feet.	
BOLINGBROKE (Hort) E. m. 2	3.00
A very large flowering milky white. In many respects like its parent, Miss Willmott, but with better habit and more robust growth. 3 feet.	
BRANDYWINE (Farr) G. m. 2	1.50
A pale silvery blue pallida with a distinct golden beard. Large flowers and an excellent grower. Fine for landscaping because of its clear blue tone. 3 feet.	
BRUNO (Bliss) E. G. m. 1	Net, 10.00
An Iris of exceptional quality much like Ambassadeur in color. S. bronze, tinted and lighted lavender; F. deep rich red purple of exceptional size, having the velvety texture of Dominion, one of its parents. 3 feet.	
B. Y. MORRISON (Sturtevant) E. G. m. 1	1.00
S. pale lavender violet; F. velvety raisin purple with a broad pale margin. A little slow in starting, but a good increaser when well established. Distinct. 33 inches.	

- CANOPUS** (Bliss) E. G. m. 2 ..... Net, \$3.00  
A free flowering Dominion seedling. S. reddish violet, finely arching; F. rich pansy violet. Heavy reticulations at the haft. The general effect is a deep plum coloring. Strong branching spikes. 3½ feet.
- CHALICE** (Sturtevant) G. f. 2 ..... 1.50  
A luminous lemon yellow self. Medium sized flowers on 32-inch stems. Tall and quite floriferous for a yellow Iris.
- CHASSEUR** (Vilmorin) E. G. m. 1 ..... Net, 2.50  
The best yellow of French origin. S. and F. a clear medium yellow with light brownish markings at the base. F. are paler at the center of blade. A very pleasing Iris giving a clear yellow tone in the garden. 3 feet.
- CITRONELLA** (Bliss) E. G. f. 2 ..... 4.00  
S. bold and arching of a clear lemon yellow, deeper at the base; F. a quiet ruddy brown, paler at the edges, with a yellow line through the center of fall. The brown falls are a beautiful contrast to its golden standards. The tallest and largest of the variegata type. 33 inches.
- CONQUISTADOR** (Mohr) E. G. m. 2 ..... 2.50  
S. deep mauve; F. large and hanging, of a tone deeper. Immense flowers on branching 4½ foot spikes. Broad heavy foliage of almost evergreen type. Needs good drainage.
- CORRIDA** (Millet) G. f. 1 ..... .50  
A beautiful, cool, gray blue with erect, slightly frilled standards and straight hanging falls, giving the flower a very lovely effect in a mass. Its clear blue tone is accentuated when planted with pale yellow or blended tones. 36 inches.
- CRUSADER** (Foster) G. m. 3 ..... .75  
S. medium violet blue; F. very much deeper. It is known as one of the clearest of the blue Iris. Large flowers of good substance on 3½-foot stems.
- DAMOZEL** (Morrison) E. G. f. 2 ..... 2.00  
Lovely white flowers with ruffled standards and flowering falls etched blue lavender. A most graceful flower, a good grower and very prolific. 3 feet.
- DEUIL DE VALERY** (Denis) G. m. 1 ..... .75  
S. copper rose; F. deep velvety reddish brown. Orange beard. A redder tone than Ambassadeur. Medium sized flowers with great intensity of color. 3 feet.
- DIONYZA** (Hort) E. s. 2 ..... 5.00  
A very large flowered, medium toned blue bi-color of Caterina parentage. Fine form. 3 feet.

- DOMINION** (Bliss) E. s. 1 ..... \$5.00  
 This variety has become the parent of a new and wonderful race of Iris, as it has broad, rounded segments and falls of fine substance and velvety texture. S. light bluish violet; F. deep velvety indigo purple of great substance. The flowers are not tall, and the plant is a slow grower, but despite this it is a very fine Iris. 2½ feet.
- DREAM** (Sturtevant) E. G. f. 2 ..... .75  
 A very pretty light pink variety of pallida habit. S. lilac pink; F. a tone deeper with bronzy reticulations at the haft. Orange beard. A very popular Iris. 3 feet.
- DULCINEA** (Mohr) E. m. 3 ..... 1.50  
 A Caterina and Trojana crossing. S. lavender; F. violet blue with lavender margins and a very pretty pearly luster. Large flowers on low, widely branching stems. 3 feet.
- EDOUARD MICHEL** (Verdier) E. G. m. 2 ..... .75  
 A very large and beautifully frilled variety of deep wine red. This is one of the most satisfactory Iris we have and its popularity has not waned although introduced in 1904. Very fragrant. 3 feet.
- EGLAMOUR** (Hort) E. G. m. 1 ..... 1.50  
 Kochii on Mesopotamica. A deep purple bi-color with huge and well formed flowers, having the color of one of its parents, and size and form of the other. A good grower when once established. Flowers on stout stiff stems. 2½ feet.
- E. H. JENKINS** (Bliss) E. G. f. 2 ..... .75  
 S. pale purple with falls of a deeper shade. Large flowers on widely branching stems. A really good blue toned Iris on the Lord of June type with more substance. 3¾ feet.
- ELBERON** (Koehler) G. f. 2 ..... .75  
 S. red purple; F. deeper red purple, veined brown purple on a cream base. Orange beard. We have not had much experience with this variety and cannot as yet speak of its merits.
- EMIR** (Yeld) G. m. 1 ..... .75  
 A good, late flowering blue, valuable on that account. S. a good shade of blue violet; F. deeper violet purple. Rich yellow reticulations at the haft. 3½ feet.
- ESPLENDIDO** (Mohr) E. G. m. 2 ..... 3.00  
 A fine, large red-purple bi-color. S. violet mauve; F. deeper with red brown markings on a cream base. Large blooms of good shape on finely branched stems. Very red in color tone. 3 feet.
- FLAMMENSCHWERT** (Goos and Koenemann) G. f. 1 ..... .75  
 S. golden yellow; F. chestnut, edged brown. A better and earlier Iris King and a very bright spot in the garden. A good grower and prolific bloomer. 2¾ feet.

- GARGANTUA** (Millet) E. G. m. 2 ..... \$7.50  
 A 4 to 4½-foot Ricardi seedling of perfect habit and greatest vigor, with large flowers. S. almost self colored lobelia blue; F. same with a suffusion of violet purple. Orange beard. Its height and stiff stem makes it invaluable for backgrounds.
- GAVIOTA** (Mohr) E. G. m. 2 ..... 1.50  
 A beautiful creamy white plicata edged yellow. Of fine finish and good texture, the coloring of the good sized flowers is unusual. Really distinct. A variety growing in popularity every year. 3 feet.
- GENERAL McPHERSON**, E. G. m. 1 ..... 1.50  
 A truly beautiful variety which we are glad to be able to list. S. creamy white; F. deep, rich reddish pansy violet. A very rich coloring. 3 feet.
- GEORGIA** (Farr) G. g. 1 ..... .75  
 S. and F. of a uniform shade of cattelaya rose. An early large flowering variety of good substance. A fine grower and free bloomer. 3 feet.
- GERMAINE PERTHUIS** (Millet) E. G. m. 1 ..... 8.00  
 Mr. P. Murrell, an eminent English Iris critic and one of the best informed men on Iris rates this variety at 90 and says: "A very fine Iris. One of the best seen in France. A Souv. de Mme. Gaudichau Seedling (and an improvement on the parent), of violet purple coloring with a most brilliant and striking beard and sweetly scented. This will be one of our most popular Iris when better known." Of exceptional vigor, good habit and freedom of bloom. 3½ feet.
- GLOWING EMBERS** (Sturtevant) E. G. m. 2 ..... 4.00  
 S. light brownish lavender; F. velvety dahlia purple. Center lighted with an orange beard and netted gold at haft. A large, rich dull red toned flower on tall, well branched stems. 4 feet.
- GOLD IMPERIAL** (Sturtevant) G. m. 2 ..... 4.00  
 A very fine yellow Iris, surpassed only by Amber, although it is a shade or two deeper than the latter. Only of medium size, its wonderful golden beard lights up the entire flower and makes it quite distinctive. 33 inches.
- GOLDEN PROMISE** (Neely) ..... 4.00  
 A new yellow Iris, we are listing for the first time. S. citron yellow; F. chrome yellow tinted lavender, bronze markings at base. Bright orange beard. The flower has good substance and stands erect. While falls are not as clear as Gold Imperial, its size will put it in the forefront of the yellow varieties.
- HARPALION** (Perry) E. G. f. 2 ..... 2.00  
 A very desirable Iris of soft coloring. S. pale lavender, overlaid bronze; F. horizontal of clear lavender blue with a golden beard. A very prolific bloomer. 4 feet.

- HARRIET PRESBY** (Presby) E. G. m. 1 ..... \$2.00  
S. rose lilac; F. brighter and a darker rose lilac. This variety is best used in backgrounds because of height and as a foil for a pale blue variety as Hippolyta or E. H. Jenkins. 4 feet.
- HERMIONE** (Hort) E. G. m. 2 ..... 1.50  
S. deep, clear blue; F. of a deeper shade with a pinkish cast. A flower of good form. All divisions are broad. Very desirable.
- HIPPOLYTA** (Hort) G. f. 1 ..... .75  
A large, mauve pallida of strong growing habit. We might say that this is one of the finest landscape varieties. Very effective planted in front of Arsace and varieties of similar color. 3½ feet.
- IMPERATOR** (Cayaux) G. m. 1 ..... 1.75  
A large, late flowering rosy pink self. S. and F. raisin purple shading white, with red brown reticulations at the haft. A vigorous grower and profuse bloomer. A duller Seminole. 3 feet.
- JACINTO** (Berry) E. s. 2 ..... 1.25  
S. light lobelia violet; F. ageratum blue. A soft colored Iris of a pinkish cast. Shown to good advantage with such delicate toned blues as Mady Carriere and Corrida. 3½ feet.
- KASHMIR WHITE** (Foster) E. s. 1 ..... 1.00  
A large white of delicate, crepy texture. One of the oldest of the whites, but it still holds its price and popularity. Must have well drained location. Cover in winter. 3 feet.
- LADY FOSTER** (Foster) E. G. m. 2 ..... .75  
S. pale blue; F. bluish violet. Large ruffled flowers of excellent shape and heavy crinkled texture. One of the finest of the clear blue varieties. 40 inches.
- LADY LILFORD** (Foster) E. G. m. 1 ..... 2.00  
This crossing of the oncocyclus Paradoxa and Pallida gave a very distinct flower of deep violet purple, with falls particularly deep in color. Quite striking. 30 inches.
- LE GRANDE FERRE** (Cayaux) E. f. 2 ..... 6.00  
S. greyish fawn tinted heliotrope; F. vinous red with a fawn margin. Coloring is quite distinct. A large free blooming variety of good growing habit. 4 feet.
- LEONATO** (Hort) E. s. 2 ..... Net, 5.00  
Similar to Lady Foster but larger and of a paler shade. Wonderful large flowers on 3½-foot stems. Considered one of the finest of the pale blue bi-colors. Very fragrant.
- LEVERRIER** (Denis) E. G. m. 3 ..... 1.25  
S. light lilac; F. pansy violet. An exceptionally tall growing variety with a distinct rose shading. Midseason. 3½ feet.

- LORD LAMBOURNE** (Perry) E. f. 2 ..... \$3.00  
 S. rose fawn suffused pale bronze; F. rich madder crimson. A fine variety of perfect habit and large well shaped flowers. One of Perry's best, and one of which we personally are very fond. 3½ feet.
- LORD OF JUNE** (Yeld) E. G. f. 3 ..... .60  
 Massive flowers. S. pale blue; F. violet blue. Although the standards of this variety do not hold up so well in bad or wet weather, the size of the flowers and the beautiful coloring still attract people and it is one of the most popular varieties. 3½ feet.
- LOUIS BEL** (Denis) E. G. f. 1 ..... 8.00  
 This variety is unique for its dark coloring. It has the deepest color of any bearded Iris. S. very dark pansy purple; F. deep velvety blackish purple. A free flowering variety, very vigorous with fine foliage. Makes a wonderful picture in the garden. 2½ feet.
- LYCAENA** (Williamson) G. f. 1 ..... .75  
 An early flowering variety on the type of Rheine Nixe. S. white; F. rich purple with lighter margins. Prolific bloomer and vigorous grower. 3 feet.
- MADY CARRIERE** (Denis) G. f. 2 ..... .75  
 A blue toned Afterglow. S. pale plumbago blue; F. ageratum blue shading to yellow at the base. A pleasing blend. 30 inches.
- MAGNIFICA** (Vilmorin) E. m. 2 ..... .75  
 An Iris of good size and color and always in demand. S. light violet blue; F. long, deep red violet. Half reticulated brown. All divisions long and narrow. 3½ feet.
- MARION MOHR** (Mohr) ..... 1.00  
 A beautifully finished flower of pale glistening lavender. Quite distinct. 3 feet.
- MARIPOSA** (Mohr) G. m. 2 ..... .75  
 Medium sized flowers with blue toned standards and French gray falls flecked purple. Very odd. 3 feet.
- MARY WILLIAMSON** (Williamson) G. m. 1 ..... 1.50  
 A quaint, pleasing Iris. S. white; F. hyacinth purple edged white. Ruffled standards and flaring falls. Quite distinct. 30 inches.
- MEDRANO** (Velmorin) E. G. m. 1 ..... .75  
 S. dark purple with a reddish cast; F. very dark crimson purple flecked with buff and lavender. A beautiful dark variety which we highly recommend. Late. 32 inches.
- MENETRIER** (Denis) E. G. m. 2 ..... 1.25  
 S. pale chromium yellow; F. dull, but strong yellow, shaded plum with a yellow edge. A really worth while Iris of the variegata coloring. 3 feet.

<b>MESOPOTAMICA</b> (Species) E. s. 4 .....	<b>\$0.75</b>
An immense flower of lavender violet on widely branching stems. Has a crinkled texture and is very fragrant. Early flowering and used extensively in hybridizing. Must have good drainage and protection in winter for good results. 4½ feet.	
<b>MICHELINE CHARRAIRE</b> (Denis) E. G. m. 2 .....	<b>9.00</b>
S. very large, well arched, pure white; F. long, flaring pure white, marked bronze yellow at the haft. A beautiful variety, the finest exhibition white in commerce. Exceptional flowers of good substance and a carnation fragrance. 3 feet. Stock limited.	
<b>MILDRED PRESBY</b> (Farr) E. G. m. 1 .....	<b>2.50</b>
S. white; F. rich dark velvety violet with a paler edge. Brighter and finer than Rheine Nixe. A free bloomer and it is considered the best of the Amoena type. 30 inches.	
<b>MDLLE. ANDREE AUTISSIER</b> (Denis) E. G. m. 2 .....	<b>1.25</b>
A very late, free flowering porcelain blue. The blooms have slightly crinkled edges and it is quite distinct. A fine variety which we highly recommend. 3½ feet.	
<b>MDLLE. SCHWARTZ</b> (Denis) E. G. m. 3 .....	<b>1.00</b>
A large pale mauve self of especially fine shape. Plant with Ann Page, which is similar in form and height, to bring out its delicate pink tone. Give well drained location for best results. 3½ feet.	
<b>MME. CECIL BOUSCANT</b> (Denis) E. G. m. 2 .....	<b>Net, 7.00</b>
This fine variety is in great demand in this country. A beautiful clear self of orchid pink with a flush of lavender at the center of the fall. An exquisite Iris. 3 feet.	
<b>MME. CLAUDE MONET</b> (Denis) E. e. 3 .....	<b>3.00</b>
An unusually deep red violet Ricardi seedling. A very fine flower but must be protected here in winter. 3½ feet.	
<b>MME. CHERI</b> (Sturtevant) E. G. m. 2 .....	<b>1.00</b>
S. violet pink; F. ageratum blue with a yellow undertone. A very beautiful variety, one of the finest of the lighter blends. Well shaped flowers on 3½-foot stems.	
<b>MME. CHOBOUT</b> (Denis) G. f. 1 .....	<b>.50</b>
S. cream, dotted and veined buff and pink and tinted lilac at the edges; F. white reticulated violet and buff at the edges. A most interesting variety, one of the best of the yellow plicatas. 3 feet.	
<b>MME. DURRANDE</b> (Denis) E. G. m. 3 .....	<b>3.00</b>
S. tawny buff shaded mauve; F. purple, tinted and margined buff. The general color tone is a dull bronze and purple. Large flowers on branching stems. A wonderful variety and one which has been praised by the most critical. Late flowering. Give good drainage and winter protection in this locality. 4 feet.	

- MME. HENRI CAYEAUX** (Cayeaux) **E. G. m. 1** ..... \$4.00  
S. reddish violet purple; F. a deep, velvety red violet. Similar in type to Ambassadeur. An outstanding French variety. 3 feet.
- MME. J. VERNOUX** (Millet) **E. G. m. 2** ..... 1.00  
S. slate blue flushed rose; F. rich petunia violet. A Ricardi seedling of the Alcazar type that is somewhat brighter and more velvety. Free flowering. 3 feet.
- MONS. ARNAL** (Denis) **E. G. m. 3** ..... Net, 4.00  
One of the most delicate and lovely colorings we have ever seen in an Iris. S. coppery yellow with a touch of mauve. F. mauve tinted violet and rose. A beautiful pale colored blend which is absolutely distinct. Large flowers on 3½-foot stems. Give good drainage and protection here.
- MONS. HUBERT** (Denis) **E. m. 1** ..... .75  
S. parma violet shading to brown at the base; F. lobelia blue, maroon reticulations at the haft. Somewhat like Asia in coloring, but lacking the yellow tone of that variety. 3 feet.
- MONS. O. PERTHUIS** (Millet) **G. f. 3** ..... .75  
S. blue flushed mauve; F. velvety, dark purplish violet. Medium sized flowers on the order of Mme. Gaudichau with long, narrow segments. Free flowering. 3½ feet.
- MOPSA** (Hort) ..... 2.50  
A large, medium toned blue variety. We are not very familiar with this variety as it has only bloomed once and no notes were taken. 3 feet.
- MORNING SPLENDOR** (Shull) **E. G. m. 2** ..... 3.00  
Awarded Silver Medal by The Garden Club of America in a competitive test in 1926. Large flowers of fine form. S. petunia violet. F. raisin purple with a reddish tone. Quite fragrant. 3 feet.
- MORWELL** (Bliss) **G. f. 2** ..... .60  
A fine pale blue of good size, form and carriage. A uniform coloring unexcelled for garden planting, especially for contrasting with a pink toned variety. 3 feet.
- MOTHER OF PEARL** (Sturtevant) **E. G. f. 2** ..... .50  
This Iris has been highly advertised as the best of its color. It is a pale, pinkish lavender self, with a creamy undertone which gives it a beautiful iridescence. From the distance or in the sunlight, the color is lost, and it looks like a gleaming, lustrous spot in the garden. 4 feet.
- NANCY ORNE** (Sturtevant) **G. f. 2** ..... .60  
Lilac purple with buff tinted styles. The general effect is a purplish rose. A very pretty pink toned blend. 3½ feet.
- NOTHUNG** (Goos and Koenemann) **G. f. 1** ..... .75  
S. sulphur yellow, suffused pale blue; F. pale violet. A lovely coloring. A variety of which we personally are very fond. 3 feet.

- OPERA (Vilmorin) G. m. 1** ..... \$0.75  
 A wonderful dark red purple. S. dark purple bronze; F. velvety crimson purple. Fine in every way, and an Iris that should be included in every collection. It is as popular as Ambassadeur or Prospero. 2½ feet.
- OCHRACEA (Denis) G. m. 2** ..... 1.50  
 S. yellowish buff or old gold, finely arching; F. coppery yellow with a large flush of blue violet in the center. This a variety becoming more popular every year. Very late flowering, a fine grower and profuse bloomer, it is satisfactory in every way. 2½ feet.
- OUR KING (Denis) G. m. 1** ..... .75  
 A splendid pink toned variety that is really good. Rosy toned flower of deep mauve pink and Bishop's violet. This description does not do justice to the variety. It looks well planted with Chester J. Hunt as both are late midseason varieties. 3 feet.
- PHYLLIS BLISS (Bliss) G. m. 1** ..... .75  
 A pale rosy lavender of good size and substance. This variety is not well known because of its dullness of tone, but combined with a pale blue it is lovely. Try Hippolyta or Cluny back of it. 2½ feet.
- PIONEER (Bliss) E. G. m. 2** ..... Net, 6.00  
 A fine Iris. S. large and incurved, a bright red purple; F. very broad, deep glowing red purple with a bright orange beard. Valuable for hybridizing. Vigorous, free flowering, good carriage. 3½ feet.
- POLARIS (Sturtevant) G. m. 2** ..... 1.25  
 A bright violet self of splendid habit. Large flowers on exceptionally tall stems. 3½ feet.
- PRAIRIE GOLD (Sass)** ..... Net, 5.00  
 At the recommendation of a very reliable critic, this new yellow Iris was added to our collection. It is said to be of good form and color and deeper toned than Gold Imperial. About 3 feet.
- PRINCE LOHENGRIN (Mohr) G. m. 1** ..... .75  
 A pinker Lohengrin. Taller and more widely branching than its name-parent. Free flowering. 3 feet.
- PRINCESS OSRA (Bliss) E. m. 1** ..... 3.00  
 A wonderful plicata. Large blooms of clear white penciled and spotted lavender, especially at the edges. This is perhaps the largest flower of its type. Very good. 2 feet.
- PROSPERO (Yeld) E. G. f. 3** ..... .60  
 Large flowers on tall widely branching stems. S. pale lavender; F. deep red purple with a lighter margin. A very good Iris of quiet coloring, but everyone likes it when in bloom. 4 feet.
- QUEEN CATERINA (Sturtevant) E. G. f. 2** ..... .75  
 A beautiful pale lavender self with a white haft veined bronze. Planted with a clear blue like Lady Foster it has a pink cast. One of the best of the American introductions. Large flowers on 3½-foot stems.

- RAJPUT** (Sturtevant) E. G. m. 3. . . . . \$2.00  
A beautiful self colored variety of violet shading to heliotrope. Flaring falls and a wonderful luminous texture that makes it fairly glisten. Excellent carrying color, fine substance, good growth. 3½ feet.
- RAMELDO** (Mohr) G. f. 2. . . . . 1.50  
A beautiful blend of dark purple and bronze, the result of a crossing of Ramona and Eldorado. Retaining the fascinating and unique qualities of them both. Quite unusual. 2¾ feet.
- RAMONA** (Mohr) S. f. 1. . . . . 1.00  
A new blend of colors resulting of the most unusual Iris. Petunia violet flushed cinnamon, lighted up by an orange beard. Vigorous, fine form and substance. 2½ feet.
- REGAN** (Hort) E. s. 2. . . . . 1.00  
"A remarkable fine and distinct variety. Rich violet blue bi-colored with exceptionally long falls. There is an unusual satiny sheen about the flower, which are remarkable for their splendid shape and poise."—(Wallace.) 3½ feet.
- REVERIE** (Sturtevant) E. m. 1. . . . . 4.00  
S. colonial buff flushed pink; F. a rich and unusual tone of dull red. A beautiful dull colored Iris that must be planted correctly to bring out its color. Cluny perhaps would go well with it, as it is a cool gray blue. 3½ feet.
- RICARDI FONCE** (Denis) E. m. 3. . . . . .75  
A self-colored Iris of dark violet with deeper velvety falls. Good sized flowers on 3-foot stems. Give good drainage.
- ROSEDALE** (Koehler) G. f. 1. . . . . .75  
A fine clear lavender overlaid with lobelia blue. Broad horizontal falls. A good clear color and profuse bloomer. 2½ feet.
- ROSE MADDER** (Sturtevant) E. G. m. 2. . . . . 3.50  
A lovely and striking Iris of true rose madder coloring. S. light; F. dark and velvety. Tall, on 3½-foot spikes. A handsome variety, well worth while. Fragrant.
- ROSE SALTERNE** (Bliss) G. m. 1. . . . . 1.00  
A very blue toned plicata. S. white penciled pale blue; F. are lined and reticulated darker blue at the haft, but lighter lower down. A most distinct variety. 3 feet.
- RUBY PERRY** (Perry) G. f. 1. . . . . 1.25  
A very good dark rose pallida with well shaped, medium sized flowers, profusely borne on 4-foot stems. Better than Pauline and somewhat darker than Harriet Presby.
- SALONIQUE** (Cayeaux) G. m. 1. . . . . 1.00  
S. cream; F. rich red purple with a few white and brown lines at the base. A good amoena, something like Rheine Nixe. Mid-season. 3 feet.

- SAN GABRIEL** (Dean) E. G. m. 3 ..... \$2.50  
 A wonderful variety producing large, fragrant flowers of lustrous lavender, even here in Ohio we have stalks with 5 flowers open at once. Starts blooming early and lasts well into the season. Needs good drainage. 4 feet.
- SANTA BARBARA** (Mohr) ..... 5.00  
 An excellent pale lavender blue, acclaimed by many as the finest of this type. A fine grower with horizontal falls, good size and substance. Tall and well branched. 40 inches.
- SEMINOLE** (Farr) G. f. 1 ..... .60  
 S. dark violet rose; F. rich velvety crimson. A splendid red color in a mass and quite popular. One of the new tones that are moderate in price and should be in every garden. 3½ feet.
- SHEKINAH** (Sturtevant) E. G. m. 1 ..... .75  
 This variety has been a standard among the yellow Iris, being the finest until perhaps the last year or two. Even now seedlings introduced as improvements on this variety are much inferior. S. and F. pale yellow with a deeper tone at the center. 3 feet.
- SHERBERT** (Sturtevant) G. f. 4 ..... .50  
 S. dull bronze; F. dahlia purple. Excellent color and free flowering. 3½ feet.
- SHYLOCK** (Hort) E. s. 2 ..... 7.50  
 A splendid variety producing immense flowers of pale violet overlaid with a lustrous silvery sheen. The flowers of this variety were the largest in our garden. 3½ feet.
- SIMMONE VASSIERE** (Millet) E. G. m. 2 ..... 2.00  
 S. very pale blue; F. aniline blue. A very beautiful and distinct variety with spreading horizontal falls. Large clean cut flowers on three-foot stems. Early and free flowering.
- SOUV. DE LOETITA MICHAUD** (Millet) ..... Net, 6.00  
 We are pleased to be able to list this wonderful variety which is considered one of the finest of the newer French Iris. Immense flowers of a beautiful shade of lavender blue produced on 4-foot stems. It is of Ricardi parentage, and therefore needs perfect drainage and protection over winters.
- SOUV. DE MME. GAUDICHAU** (Millet) E. G. f. 1 ..... 1.00  
 An excellent, early flowering deep purple bi-color. A most satisfactory Iris; hardy, free flowering, vigorous and producing large blooms. It is considered the best of the dark blue varieties. 3½ feet.
- STEEPWAY** (Scott) G. m. 1 ..... .75  
 S. fawn, suffused reddish fawn; F. rosy mauve. Its fine points are the rounded shape of the standards and falls and the artistic glow it makes in a mass. 3 feet.

<b>SUSAN BLISS</b> (Bliss) E. G. f. 1	\$1.75
A beautiful Iris of mallow pink. One of the finest of the so-called pink varieties and quite hardy in this climate. Very effective in the garden. 3½ feet.	
<b>SUZON</b> (Millet) G. f. 3	.50
S. red violet; F. red plum with white and mulberry reticulations at the haft. Valuable for its late blooming. 3 feet.	
<b>SWAZI</b> (Bliss) E. s. 1	Net, 12.50
S. bluish purple; F. rich velvety pansy violet. Very large flowers of excellent substance. Closest in color to Dominion than any of its seedlings. 3 feet.	
<b>SWEET LAVENDER</b> (Bliss) E. G. m. 1	1.00
S. pale lavender; F. horizontal and of a deep rose lavender. The general effect is lovely shade of mauve. It has a peculiar charm because of its color and form. We personally are very fond of it. 3 feet.	
<b>TINTALLION</b> (Sturtevant) G. f. 1	.75
An excellent variety for a low border. Flowers, medium sized, profusely borne on 2-foot stems. Bluish white, shading to blue at the edges. A beautiful color.	
<b>TITAN</b> (Bliss) E. G. m. 1	4.00
Arching standards of bright violet blue; F. broad, of deep violet purple. A large flower of Dominion parentage with great substance and borne on 3-foot stems.	
<b>TROOST</b> (Bliss) G. f. 1	.60
A really beautiful flower and an improvement on the well known variety, Her Majesty. S. deep rosy purple; F. paler rosy purple veined violet. Large flowers borne on 2½-foot stems.	
<b>TRUE CHARM</b> (Sturtevant) E. G. f. 2	1.00
A large flowered, exceptionally tall plicata. Flowers, white frilled blue lavender. One of the best of the blue frilled plicatas. Profuse bloomer. 3½ feet.	
<b>VALKYRIE</b> (Sturtevant) E. s. 1	3.50
A most striking and unusual coloring. Its viking name fitting excellently with its somber tone. S. olive lake; F. velvety dark maroon. Late. 3½ feet.	
<b>VIKING</b> (Bliss) G. f. 1	.60
A splendid violet blue self for garden planting. Very free flowering. Try it with a bronzy toned variety, its clear blue tone acts as a foil for other Iris. Should be in every collection. 3 feet.	
<b>VINCENTIO</b> (Hort) E. m. 2	1.00
"A fine purple bi-color with large spreading red purple falls. A good companion to Hermione, which it resembles though somewhat redder in tone."—(Wallace.) 3½ feet.	

- VIRGINIA HALE** (Brallior) **G. g. 2** ..... \$1.00  
 Similar in color and shape to Princess Beatrice with a little deeper tone. Interesting for comparison with the older variety. 3 feet.
- VIRGINIA MOORE** (Shull) **G. f. 1** ..... .75  
 A very good yellow variety. Valuable to prolong the season of bloom. We believe that Iris enthusiasts should be careful to not only buy early and midseason varieties. A few late flowering ones will prolong the season for a week to ten days.
- W. E. TERRY** (Perry) **G. m. 3** ..... 1.00  
 A strong grower with brilliant colored flowers. S. light violet blue; F. bright crimson purple. It is of the Ann Page type of flower, but with more lilac in it than that variety. 4 feet.
- WHITE QUEEN** (Geylenkek) **G. f. 2** ..... 1.00  
 An absolutely pure white variety of fine form and heavy substance. A profuse bloomer that starts flowering early and lasts well into the season. Fair sized flowers well borne on 3-foot spikes.
- WILD ROSE** (Sturtevant) **E. s. 1** ..... 2.50  
 A delicate pink, the color of a Prairie Rose with a fine, silvery finish. 33 inches.
- YELLOW MOON** (Sturtevant) **E. G. m. 1** ..... 3.00  
 A very soft pale yellow of pallida habit. It has a beautiful satiny texture and fine shaped flowers. One of the loveliest of the yellow varieties. 3 feet.
- YEOMAN** (Bliss) **E. G. f. 2** ..... 1.75  
 A Dominion Seedling. S. light bluish violet; F. deep violet blue. It is a strong grower and has a clear blue tone. 3 feet.
- YOLANDE** (Millet) ..... 3.50  
 A seedling of Mme. Gaudichau bearing large flowers. S. dark blue purple; F. velvety, same color as standards. Considered an improvement on the parent. 3 feet.
- ZADA** (Emigholz) **E. G. f. 2** ..... 3.50  
 A fine pure white, the shape of White Knight, one of its parents, but taller and with branching stems. Erect style arms which disclose a deep golden beard, that lights up the flower. It is quite hardy, the most profuse flowering tall white we have seen and should prove valuable for a white tone in garden planting. One grower from Massachusetts was quite enthusiastic about it and wrote that he thought it better than a new white that was selling for \$15.00. 3 feet. Large blooming size roots.

# Tall Bearded Iris

## CLASS 2

A list of standard varieties. Prices quoted on quantities of 1, 3, and 12 of a variety; 6 or more of a variety at the dozen rate.

We wish to urge the gardener to plant Iris in small groups for immediate effect. The cost in quantities, of varieties in this Class is negligible, and just to buy one of a kind means you must wait several years before it will produce a mass of bloom. Many varieties look much better massed, than just to have one or two flower stalks in bloom.

	1	3	12
<b>AFTERGLOW</b> —G. f. 2. Soft grey lavender shading to yellow through the center. Pleasing color. 3 feet.....	\$0.35	\$0.90	\$3.00
<b>ALBERT VICTOR</b> —G. f. 1. Large blue lavender. Excellent for landscaping. 3 feet.....	.20	.45	1.50
<b>ALCAZAR</b> —E. G. f. 2. S. light bluish violet; F. deep velvety purple. Large flowers. 3½ feet.....	.35	.90	3.00
<b>AMBIGU</b> —G. m. 1. S. smoky red; F. velvety, reddish brown. Very effective red toned variety. 2½ feet.....	.50	1.25	.....
<b>A. M. BRAND</b> —G. f. 1. S. golden yellow; F. velvety red purple. Late. Quite distinct. 2½ feet.....	.35	.90	3.00
<b>ANNE LESLIE</b> —m. 1. S. white tinted rose; F. dahlia carmine. 27 inches.....	.40	1.00	.....
<b>ARCHEVEQUE</b> —G. f. 1. One of the best dark purple Iris for massing. S. rich violet purple with velvety falls. 2 feet.....	.25	.60	2.00
<b>AUREA</b> —G. m. 1. A good clear yellow. One of the best of this type. 2 feet.....	.25	.65	2.25
<b>AURORA</b> —G. m. 1. Large, tall, pale lavender pink. The best of the older tall pink varieties. Looks well planted with Clio as both are similar in form and height. 3 feet.....	.50	1.25	4.50
<b>AUTOCRAT</b> —G. m. 1. S. clear blue, dome shaped; F. veined darker. 2 feet.....	.30	.75	.....
<b>AZURE</b> —G. f. 1. S. lavender blue; F. velvety violet blue, clear tone. Very good. 32 inches.....	.30	.75	2.50
<b>BARONET</b> —G. g. 2. A tall clear blue toned Caterina seedling. S. chickory blue; F. violet blue deepening at beard. 3 feet.....	.50	1.25	.....
<b>BARTON HARRINGTON</b> —G. f. 1. S. clear golden yellow; F. rich, velvety brown. Good color. Late. 2 feet.....	.40	1.00	3.50

	1	3	12
BELCOLOR—G. m. 1. S. deep straw yellow; F. creamy white reticulated brown. 33 inches.....	\$0.50	\$1.25	.....
CAMELOT—G. f. 1. Very good plicata. White frilled blue. Fine for massing. 3 feet.....	.30	.75	\$2.50
CAPORAL—G. f. 1. Deep reddish violet. A taller Caprice. 3 feet.....	.40	1.00	.....
CAPRICE—G. f. 1. Rosy red purple. Good for a low border. 2 feet.....	.20	.45	1.60
CATERINA—G. f. 3. Large clear lavender. Very fragrant. 4 feet.....	.35	.90	3.00
CECIL MINTURN—G. f. 1. Soft cattelya violet. Very fine. Good pink for massing. Early mid-season.....	.60	1.50	5.00
CHESTER J. HUNT—G. f. 1. Splendid clear blue. One of the best. 27 inches.....	.35	.90	3.25
CLARENCE WEDGE—G. f. 1. S. heliotrope, tinged yellow; F. purple red. 2 feet.....	.25	.55	1.60
CLIO—G. f. 1. Large fluffy lavender. 3½ feet.....	.30	.75	2.70
CLUNY—G. f. 2. An excellent pallida of clear lilac blue. 3½ inches.....	.60	1.50	5.00
COL. CANDELOT—G. f. 1. S. smoky copper; F. velvety crimson. Good color. 3 feet.....	.50	1.25	4.50
DALILA—G. f. 1. S. palest flesh white; F. rich red purple. Wonderful color and a charming flower. 2½ feet.....	.50	1.25	4.50
DANIEL LESEUER—G. f. 1. Odd toned plicata of bronzy lavender and blue. Looks well planted with a clear blue. 3 feet.....	.50	1.25	4.50
DARIUS—G. f. 1. S. clear yellow; F. pale lilac faded to cream at edge. One of the good older varieties giving a yellow tone in the garden. 2 feet.....	.25	.60	2.25
DAWN—G. f. 1. Sulphur yellow. Valuable for its color. Improved Flavescens. Early. 2 feet.....	.35	.90	3.00
DEMI-DEUIL—f. 1. An odd, dark brown and violet veined plicata, 2½ feet.....	.25	.55	1.70
DIMITY—G. f. 1. A very good white plicata with mauve and lavender veinings. 3 feet.....	.50	1.25	4.50
DORA LONGDEN—G. f. 1. S. pale lavender, suffused yellow; F. velvety red lilac. Good. 2½ feet.....	.50	1.25	4.50
DR. MANTOR—G. f. 1. S. light bronze; F. bronzy yellow. Late. Bronzy effect in a mass. 2½ feet..	.25	.60	1.80

	1	3	12
DUSKY MAID—G. f. 1. S. pale buff; F. broad deep mauve purple with a paler margin. A good mid-season variety which can be used in landscape work. 2½ feet.....	\$0.40	\$1.00	\$3.25
ELDORADO—f. 1. Dull bronze and lavender with brilliant bronze style arms. 30 inches.....	.30	.75	2.50
FAIRY—G. f. 1. White suffused pale blue. The best tall white of the older varieties. 3 feet.....	.20	.45	1.60
FLAVESCENS—G. f. 1. Pale yellow. 30 inches.....	.20	.45	1.60
FRANCINNA—g. 1. Plicata. White spotted and veined reddish purple. 3 feet.....	.35	.85	3.00
GERALDINE—G. f. 1. S. tinged lavender; F. white reticulated purple. A good variety to plant with tall blue Iris. 3 feet.....	.50	1.25	4.50
GULES—E. G. f. 2. S. pale lilac short red; F. pansy violet. Good color. 3½ feet.....	.50	1.25	4.50
HALO—E. G. f. 2. A deeper toned Lord of June. 3 feet.....	.60	1.50	.....
HER MAJESTY—G. f. 1. S. rosy lilac; F. deeper, veined red purple. Late. Good for low border. 30 inches.....	.20	.45	1.60
HUBERT—G. f. 1. Deep violet blue; with a deep orange beard. 2½ feet.....	.20	.50	1.60
IRIS KING—G. f. 1. S. old gold; F. velvety crimson bordered gold. 2 feet.....	.20	.45	1.50
ISOLENE—E. G. f. 2. S. lilac pink; F. purplish old rose with a golden throat. Very fine. 3 feet.....	.40	1.00	3.50
IVANHOE—G. f. 1. S. light lavender; F. deep violet. 2½ feet.....	.40	1.00	.....
JEANNE D'ARC—G. f. 1. White frilled blue. Good plicata for the garden. 2 feet.....	.30	.75	2.50
JUANITA—G. f. 1. Large clear blue. Fine for back-grounds. 4 feet.....	.25	.65	2.25
KATHRYN FRYER—G. f. 1. S. golden yellow; F. velvety red purple. 2½ feet.....	.40	1.00	3.50
KHARPUT—G. f. 1. A large, early flowering dark purple. 2½ feet.....	.20	.45	1.50
KNYSNA—G. f. 1. S. clear yellow; F. velvety red brown. Clear color. 33 inches.....	.50	1.25	4.50
KOCHII—G. f. 1. An early flowering deep claret purple. 33 inches.....	.20	.45	1.60

	1	3	12
LA NEIGE—G. f. 1. Glistening white flowers with wavy edges. 27 inches. Good. ....	\$0.50	\$1.25	\$4.50
LEANDER—G. m. 1. Good reddish violet. Well shaped. Unusual shade and fine flower. 2½ feet. ....	.50	1.25	.....
LEPINOUX—E. G. f. 3. S. aniline blue; F. deep purple. A Ricardi hybrid with large flowers. 4 feet. ....	.50	1.25	4.50
LOHENGRIN—G. f. 1. Ruffled pinkish mauve. Blooms itself to death. Place with blues as Albert Victor or Morwell to bring out its pink color. 3 feet. ....	.25	.60	2.00
LORELEI—G. f. 1. S. light yellow; F. marine blue bordered cream. Fine as its open cupped standards carry the yellow tone. 2 feet. ....	.20	.45	1.60
LURLINE—G. f. 1. A pallida of pale reddish mauve. Somewhat like Dream in color but darker. Prolific bloomer. 3 feet. ....	.40	1.00	3.50
MAJOR—G. m. 1. Early deep red purple bi-color. Very large flowers. Good variety. 3 feet. ....	.25	.65	2.25
MARGARET MOOR—G. f. 1. A fine reddish lilac self. The best "pink" for massing. Very free flowering. 3 feet. ....	.35	.85	3.00
MARION CRAN—G. f. 3. Brilliant light purplish rose. Vigorous and free flowering. 3½ feet. ....	.35	.85	.....
MARY GARDEN—f. 1. White, heavily sanded plum. Quaint plicata. 2½ feet. ....	.25	.55	1.70
MAUVINE—G. f. 1. A fine tall mauve self. Excellent massed. 2½ feet. ....	.30	.75	2.50
MEDALLION—G. f. 1. S. yellow, corn shaped; F. yellow, heavily veined red. 2 feet. ....	.25	.55	1.90
M. G. PETERS—f. 1. S. yellow, tinged heliotrope; F. violet molted brown and edged yellow. Very pretty. Late. 2½ feet. ....	.35	.85	3.00
MINNEHAHA—G. m. 1. S. creamy white shaded yellow; F. reticulated maroon on yellow ground. Good. 2½ feet. ....	.50	1.25	.....
MIRANDA—G. f. 2. A fine, early flowering violet blue with arched standards and flaring falls. Prolific bloomer. One of the best of the true blue Iris. 3½ feet. ....	.40	1.00	3.50
MISTRESS FORD—E. G. m. 2. A tall red purple bi-color. 3½ feet. Large flowers. ....	.60	1.50	.....
MME. BOULLET—m. 1. S. buff, deep red edge; brown lines at base; F. yellow, lined and dotted brown. 2½ feet. ....	.35	.90	.....

	1	3	12
MME. CHEREAU—G. f. 1. White frilled blue. An old variety still used for landscaping. 3½ feet....	\$0.20	\$0.45	\$1.70
MONSIGNOR—G. f. 1. S. pale violet; F. heavily overlaid with dusky violet. Late flowering and valuable, as there are few violet varieties in bloom at that time. 2½ feet.....	.35	.90	3.00
MOLIERE—E. G. m. 1. S. violet blue; F. deep velvety purple. Immense flowers. 2½ feet.....	.50	1.25	.....
MRS. ALAN GRAY—G. f. 1. Pale mauve, fine for a low border or hillside. 2 feet.....	.20	.45	1.50
MRS. COWLEY—G. f. 1. S. coppery buff; F. velvety rose purple. Good color. Place with blues as a contrast. 2½ feet.....	.35	.90	3.00
MRS. G. DARWIN—G. m. 1. A beautiful creamy white with slight purple and gold reticulations about the haft. Very pretty. Late. 2½ feet....	.30	.80	.....
MRS. H. DARWIN—G. f. 1. White, falls marked violet. Also good for a low border. 2 feet.....	.20	.45	1.60
MRS. HAW—G. f. 1. Well shaped flowers of a beautiful shade of lavender pink. 2½ feet.....	.35	.90	.....
MRS. W. E. FRYER—G. f. 1. S. white shaded heliotrope; F. purple crimson, bordered lighter shade. Good, late flowering variety. 33 inches....	.35	.90	.....
NEPTUNE—E. G. f. 2. S. pale lavender; F. of a deeper tone. Immense, well shaped flowers of a pleasing tone. 3 feet.....	.50	1.25	4.50
NIBELUNGEN—f. 1. S. fawn yellow; F. violet purple with a fawn margin. 2 feet.....	.20	.45	1.50
NIRVANA—G. f. 2. S. pearl, flushed pale violet; F. lavender. 3 feet.....	.50	1.25	.....
ORIFLAMME—G. m. 1. Large, light violet blue. One of the largest of older varieties. 3 feet.....	.40	1.00	.....
PALAUREA—G. f. 1. Soft lavender pallida with a yellow glow in the center. Makes a beautiful mass. 2½ feet.....	.50	1.25	4.50
PALLIDA COMO—G. f. 2. S. violet; F. deep aniline blue. A fine tall, late flowering blue; excellent for backgrounds. 4 feet.....	.40	1.00	3.50
PARISIANA—f. 1. Large flowered plicata. White, frilled and dotted light purple. 2½ feet.....	.35	.90	3.00
PAULINE—G. m. 1. A fine large flower of pansy violet. A good red purple for landscaping.....	.35	.90	3.00

	1	3	12
<b>PERFECTION—G. f. 1.</b> Blue and velvety purple. A good cheap variety for landscaping, but surpassed by newer introductions. 2½ feet.....	\$0.20	\$0.45	\$1.60
<b>POCAHONTAS—g. 1.</b> White bordered blue. Free flowering plicata. Large orchid type flowers. 3 feet.....	.30	.75	2.50
<b>PRINCESS BEATRICE—E. G. m. 1.</b> Large flowers of lovely clear lavender with falls of a deeper tone. Has a beautiful iridescent sheen. 3 feet.....	.35	.90	3.25
<b>PROSPER LAUGIER—G. f. 1.</b> S. light bronze red; F. velvety ruby purple. Very good bronze. 2½ feet.	.25	.55	1.90
<b>QUAKER LADY—G. f. 1.</b> Lavender and ageratum blue, suffused yellow. Beautiful massed with pinks or blues. 3 feet.....	.30	.75	2.50
<b>QUEEN ALEXANDRA—G. f. 1.</b> S. purplish lilac; F. lilac reticulated bronze. A much admired variety. 2½ feet.....	.25	.55	1.70
<b>QUEEN OF MAY—G. f. 1.</b> The good old "pink" variety still used in landscaping. Early and free flowering. A pretty shade of lilac pink.....	.20	.45	1.60
<b>RHEINE NIXE—G. f. 1.</b> This beautiful variety should have a place in every garden. S. white; F. rich purple, margined white. Free bloomer. Late. 3 feet.....	.35	.90	3.00
<b>ROMANY—E. m. 1.</b> S. yellow; F. bright red. 2½ feet.	.60	1.50	.....
<b>ROSEWAY—G. f. 2.</b> S. Phlox purple; F. of a duller shade. Orange beard. A deep red pink effect. Strong branching spikes. Carries well in a mass. 3 feet.....	.50	1.25	4.50
<b>SARABANDE—G. m. 2.</b> S. cream flushed pink; F. purple, with a wide margin of cream. A dis- tinctive and pleasing combination. 3 feet.....	.40	1.00	3.50
<b>SARPEDON—E. G. f. 2.</b> S. bluish violet; F. hyacinth purple. Large flowers on 3-foot stems.....	.40	1.00	3.50
<b>SHALIMAR—E. G. m. 2.</b> A well branched blue bi- color of good size. 3 feet.....	.50	.90	4.50
<b>SHELFORD CHIEFTAIN—G. m. 3.</b> S. light blue; F. deeper shade. Only valuable for landscape effect. 3½ feet.....	.35	.90	3.00
<b>SHERWIN WRIGHT—G. f. 2.</b> A beautiful clear shade of golden yellow. Quite popular. Plant with Archeveque for contrast. 2 feet.....	.35	.90	3.00
<b>SINDJKHA—G. f. 2.</b> Large flowers of deep lavender with buff shading. Charming color combination. Free flowering.....	.50	1.25	4.50

	1	3	12
<b>SOUV. DE LA GRANGE</b> —G. m. 1. S. bluish violet; F. rich pansy violet. 2½ feet . . . . .	\$0.25	\$0.60	.....
<b>SQUALENS VEIL OR</b> —f. 1. S. dull bronze yellow; F. same, veined heavily with violet. Looks well planted with clear blues . . . . .	.35	.90	\$3.00
<b>STAMBOUL</b> —G. f. 2. S. light blue; F. rich violet blue. Large flowers of pleasing shade. 3 feet . . . . .	.40	1.00	3.50
<b>SUSANNE AUTISSIER</b> —G. f. 3. S. aniline blue; F. purple violet. Large flowers on 3-foot spikes . . . . .	.50	1.25	.....
<b>SYPHAX</b> —G. f. 1. S. pale violet, almost white; F. deep velvety crimson violet. A very effective color in a mass. 2½ feet . . . . .	.50	1.25	4.50
<b>TRISTRAM</b> —G. f. 1. S. pure white; F. velvety blackish purple heavily veined white at the base. Most distinctive. Late. 2½ feet . . . . .	.50	1.25	4.50
<b>TROJANA</b> —G. f. 3. S. light blue; F. deep purple violet. Large flowers. 3 to 4 feet . . . . .	.35	.90	3.00
<b>WHITE KNIGHT</b> —G. f. 1. A pure white. Fair sized blooms but an excellent grower. Good form and substance. Fragrant. 2 feet . . . . .	.40	1.00	3.50
<b>WM. MARSHALL</b> —G. f. 1. A large mauve pallida. Large flowers on 3½-foot spikes . . . . .	.40	1.00	.....
<b>W. J. FRYER</b> —G. f. 2. S. bright yellow; F. deep velvety crimson purple. The falls are bordered yellow. A very good variegata. 3 feet . . . . .	.50	1.25	4.50
<b>WINDHAM</b> —G. f. 1. S. pale lavender pink; F. same, veined darker. Plant in half shade to keep its color. 2 feet . . . . .	.20	.45	1.60
<b>WYOMISSING</b> —G. f. 1. Pale creamy rose self. Good for landscaping. 2½ feet . . . . .	.20	.45	1.60
<b>ZOUAVE</b> —m. 1. A delicately colored plicata. S. white, suffused lobelia blue; F. white, spotted violet at the margins. Quaint. 2 feet . . . . .	.50	1.25	4.50

## Intermediate Iris

This is a section of Iris that has been sadly neglected by both the hybridizer and the collector. Only recently have new varieties been introduced. Mr. Jacob Sass has produced several good white and yellow Intermediates that are taller and larger than existing varieties. From England comes word that they have two very large yellows. We have increased our list and hope next year to be able to list some of the newer introductions along this line.

These bloom before the tall bearded and go well with Darwin and Breeder tulips. All these are free flowering and vigorous.

**BOSNIAMAC—G. m. 1.** S. creamy white; F. same, tinged aniline blue. One of the largest flowers of this section and one of the tallest. 2 feet.  
30 cts. each; 3 for 75 cts.

**DOROTHEA—G. f. 1.** Large crinkled flowers of pale blue lavender. Very pretty massed. The tulip, Clara Butt, would look well with this variety. One of the earliest to bloom. 18 inches.  
20 cts. each; 3 for 45 cts.; \$1.80 per doz.

**FIRMAMENT—E. G. m. 2.** A large flowering light blue with deeper colored falls which may be classed as an Intermediate. Very tall for blooming at such an early date. 3 feet.  
50 cts. each; 3 for \$1.25

**FRITJOF—G. f. 1.** S. lavender; F. purple, shaded lavender. Quite a pretty color. 18 inches.  
25 cts. each; 3 for 65 cts.; \$2.40 per doz.

**GERDA—G. f. 1.** A cream and yellow bi-color of a quite charming color. 18 inches.  
25 cts. each; 3 for 65 cts.; \$2.40 per doz.

**HALFDAN—G. f. 1.** A beautiful creamy white with olive markings. Profuse bloomer. 20 inches.  
25 cts. each; 3 for 65 cts.; \$2.25 per doz.

**HELGE—G. m. 1.** One of the best of the Intermediates. A most clear and pleasing yellow. 18 inches.  
25 cts. each; 3 for 70 cts.; \$2.50 per doz.

**INGEBORG—G. f. 1.** A large pure white, free flowering. Produces large flowers on 20-inch stems. Good.  
20 cts. each; 3 for 45 cts.; \$1.80 per doz.

**PRINCE VICTOR—G. m. 1.** S. blue; F. deep velvety purple. A rich color. 18 inches.  
35 cts. each; 3 for 90 cts.; \$3.25 per doz.

**SOLEDAD—G. m. 1.** New. S. pale yellow; F. amber yellow. Very large and fragrant.  
75 cts. each

**WALHALLA—G. f. 1.** S. lavender; F. purple. Free flowering and vigorous. 2 feet.  
20 cts. each; 3 for 45 cts.; \$2.00 per doz.

**YELLOW HAMMER—G. f. 2.** New. Large flowers of light amber yellow, blooming early and lasting for a long time. Fine shape. One of the best. 2 feet.  
\$1.25 each

**ZWANENBURG—G. m. 1.** S. amber, shading to live green, striped deep purple maroon. F. dark live brown edged violet. Very large flowers of fine shape. Striking color. Try Cottage Tulip Vividiflora Praecox with it for contrast. 15 inches. Produce very small rhizomes.  
60 cts. each; 3 for \$1.50

## Beardless (Apogon) Iris

This class has narrow, grass like, foliage and tall, slender flower stems. Excellent for cut flowers and very effective in a hardy border, as the foliage stays green all season. The plants like moist soil. They should be planted in early spring or in Fall and kept watered until growth begins. Avoid use of lime when planting. Old rotted manure is a good fertilizer.

**DOROTHEA K. WILLIAMSON.** Large flowers of velvety dark madder crimson. A very free flowering and vigorous fulva hybrid. Fine for cutting. 2½ feet 75 cts. each; 3 for \$2.00

**PSEUDO-ACORUS.** The Water Iris. Produces large flowers of bright yellow. Grows to the height of 6 feet in marshy or damp places. Do not place in a pool or in water. 25 cts. each; 3 for 65 cts.

**SIBERICA-BUTTERFLY.** Beautiful porcelain blue. 4 feet. 75 cts. each; 3 for \$2.00

**SIBERICA-EMPEROR.** Deep violet blue. Large circular falls. Very rich color. 4 feet. \$1.00 each; 3 for \$2.50

**SIBERICA-GEORGE WALLACE.** S. violet blue; F. white, veined and tipped blue. Small flowers. Very effective in a garden. 25 cts. each; 3 for 60 cts.; \$2.00 per doz.

**SIBERICA-MRS. PERRY.** Silver white, flushed pale rose. Very pretty. 2 feet. \$1.00 each

**SIBERICA-ORIENTALIS.** Deep rich purple. 3 feet. 25 cts. each; 3 for 60 cts.; \$2.00 per doz.

**SIBERICA-PERRY'S BLUE.** Large flowers of sky blue. An excellent variety, one of the most popular of the beardless Iris. 4 feet. 75 cts. each; 3 for \$2.25

**SIBERICA-SNOW QUEEN.** Pure glistening white with a yellow throat. Prolific bloomer. 2 feet. 25 cts. each; 3 for 60 cts.; \$2.00 per doz.

**SIBERICA-SKYLARK.** Sky blue, falls edged with a fine thread of white. 3½ feet. 75 cts. each; 3 for \$2.00

**SIBERICA-SUNNYBROOK.** Alice blue. 3½ feet. 75 cts. each; 3 for \$2.00

**SPURIA-OTHALEUCA.** Large flowers of ivory texture with great substance, and an orange blotch on the center of the falls. Rampant grower with stiff, heavy foliage and flower stem. Prolific bloomer. Late. 35 cts. each; 3 for 90 cts.; \$3.25 per doz.

**VIRGINICA.** A native species growing near streams and marshes but adaptable to garden conditions. Flowers of showy violet blue with a white blotch. Bent flower stalk. Late. 25 cts. each; 3 for 60 cts.; \$2.00 per doz.
